DETAILED ACTION

Amendment

1. Acknowledgement is made of Amendment filed 3 May 2004.

Allowable Subject Matter

2. Claims 1-14 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The record of prior art fails to teach a computer software including computer readable code configured to create a printer label format based on a printed label that has been scanned, the computer readable code configured to scan a label and then use the scanned label to generate a label format using optical character recognition (OCR), wherein the computer readable code is configured to recognize text on the scanned label as text, is configured to recognize graphics on the scanned label as graphics, and is configured to characterize as graphics any items on the scanned label which are not specifically recognized by the computer readable code, the label format created from the scanned label thereafter being useable to print labels similar in format to the label which was scanned and used to create the label format.

Benade teaches a computer software comprising computer readable code configured to create a printer label format based on a label, which has been designed/desired by the user, using the label generation apparatus in user friendly fashion with the user at the keyboard and display of the processor (col. 6, lines 39-42), the computer readable code configured to convert the designed label into a label format using optical character recognition (OCR), wherein the computer readable code is configured to recognize text on the scanned label as text, is configured to recognize graphics on the scanned label as graphics, and is configured to characterize as

graphics any items on the scanned label which are not specifically recognized by the computer readable code, the label format being useable to print labels.

However, Benade fails to specifically teach the computer software including computer readable code configured to create a printer label format based on a printed label that has been scanned, the computer readable code configured to scan a label and then use the scanned label to generate a label format using optical character recognition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
